The WIP1200 Indicator brake light

This extremely versatile bicycle indicator set features wireless bicycle turn signal that can be operated with touch sensor panel. No more desperately arm-waving when making a turn. The super-bright 3 orange LED indicators are visible from any angle. The super-bright 4 red LED brake light has a built in 3-axis accelerator for acceleration and deceleration. It has modes including a continuous flash that can be seen for miles.

- Perfect size for most bicycles
- Waterproof and resilient
- Continuous and flashing modes
- Quick-release brackets for security
- Emergency charger function
- Touch-sensitive controls
- Smart USB charging design
- Rechargeable Li-poly battery
- Control board up to 10 hours
- Light board up to 60 hours
- Comes with power output cable, manual, adaptors
- Lightweight design, only 90g in total
